## 1. INTRODUCTION

Escambia County tasked Mott MacDonald with evaluating the existing stormwater ponds within the Eleven Mile Creek Basin and identifying those stormwater ponds which the water quantity and quality could potentially be improved. The proposed enhancements may include expanding the pond site, rehabilitation of the underdrain, and upgrading the outfall structure. Escambia County provided a list of 181 stormwater ponds for review. The stormwater pond list will be refined based on the construction dates and County ownership, as detailed later in this report. The following report documents the evaluation process, identifies the type of potential improvements, and provides a stormwater pond ranking based the most beneficial.

## 2. STORMWATER POND DATA

Escambia County identified 181 stormwater ponds within the Eleven Mile Creek Basin. The County's stormwater pond list included information on the pond identification number, property owner, address, construction date, maintenance status, and other miscellaneous information. A list of stormwater ponds sites can be found in **Appendix A**. Figure 1 denotes all the stormwater pond locations in red within the basin.

**Figure 2.1 Stormwater Pond Locations**

### 3. EVALUATION PROCESS

Mott MacDonald's evaluation process began by reviewing the list of 181 pond sites and identifying those pond sites, which could be eliminated due to construction date or pond ownership. **Appendix A** contains the original list of pond sites provided by the County. This list was refined to include only those ponds constructed prior to April 2014. Stormwater ponds constructed prior to April 2014 were typically designed for the 25-year storm event. After severe flooding in April 2014, Escambia County revised the land development code to require all stormwater ponds to be designed up to the 100-year storm event. Pond ID Numbers 79, 401, 621, 660, and 5157 have either recently been or are currently under redesign/reconstruction and therefore were removed from the list. Pond 22 is not owned by the County. This process reduced the pond list to 82 candidate sites. The refined stormwater pond list was then evaluated for pond expansion or stormwater treatment enhancements.

#### 4. POND EXPANSION SCORING CRITERIA

The County tasked Mott MacDonald with evaluating which pond sites could be expanded to increase the pond volume. Pond expansion scoring criteria was based on available land onsite or adjacent to the pond site, complexity of acquisition, constructability, permitting, level of basin development, and infrastructure required. Engineers' option of benefit/feasibility was used to eliminate pond sites which may not be practical for expansion due to the land size, potential wetlands, land type, or constructability. A total of 49 of the 82 stormwater ponds were eliminated due the inability to find available land, environmental impacts, or option of benefit/feasibility. The remaining 32 stormwater pond sites were evaluated for pond expansion.

The scoring criteria considers several factors at each individual pond site and assigns a score from 1-5 for each, with a score of 5 being the most favorable and score of 1 being the least favorable. The total scores for each pond were compared to generate a basic ranking of pond sites considering the given parameters. Table 4.1 below shows the decision matrix and point ranking.

**Table 4.1 Pond Expansion Scoring Criteria**

Eleven Mill Creek Basin Pond Expansion	
Decision Criteria	Points
Property Acquisition Complexity	0 - 5
Level of Basin Development	0 - 5
Permitting	0 - 5
Constructability	0 - 5
Infrastructure Required	0 - 5
Permitting	0 - 5

The project criteria and point system is described below:

##### **Property Acquisition Complexity**

Property Acquisition Complexity is the ease or difficulty for the County to obtain the land required for the stormwater pond site. Some factors that could make property acquisition difficult are number of parcels required, and property owner. The criteria for this ranking is as follows:

- 0 – 1 Multiple parcel owners and/or developed. Utility Company owned site.
- 2 – 3 Several parcel owners and/some development.
- 4 – 5 One or two parcel owners or County owned with no or very little development.

**Level of Basin Development**

The level of basin development is defined as the development density of the land within the stormwater basin which could be routed to the pond site. The criteria for this ranking is as follows:

- 0 – 1 Undeveloped or low-density drainage basin. 0 to 10% of the area is developed.
- 2 – 3 Medium density drainage basin. 20 to 60% of the area is developed.
- 4 – 5 High residential or commercial density drainage basin. 60 to 100% of the area is developed.

**Constructability**

The constructability criteria rank the ease or difficulty of building the pond facility based on existing topography, adjacent building/structures, and creeks/wetlands.

- 0 – 1 Very difficult to construct the pond facility due to grades, close proximity of structures, or environmental concerns.
- 2 – 3 Slightly difficult to build the pond facility. Speciality equipment or construction sequencing may be required.
- 4 – 5 Not difficult to construct the pond facility. General construction techniques can be used for this project.

**Infrastructure Required**

The criteria for the infrastructure required is the ease or difficulty to route runoff to the stormwater pond. Stormwater runoff can be piped, ditched, or sheet flow into the pond. The criteria for this ranking is as follows:

- 0 – 1 Requires numerous inlets and large drain pipes to collect and convey the runoff to the pond.
- 2 – 3 Minor stormwater conveyance system needed to collect and convey the runoff to the pond.
- 4 – 5 Minimal to no stormwater piping required.

**Permitting**

Permitting is defined as the ease or difficulty to obtain County, State, and Federal permits allowing for the construction of the stormwater pond. The criteria for this ranking is as follows:

- 0 – 1 Requires permitting with many environmental impacts.
- 2 – 3 Standard permitting required. No major environmental impacts.
- 4 – 5 No permitting required.

## 5. POND EXPANSION RANKINGS

Table 5.2 details the expansion scoring criteria, total score, and ranking for each pond site. **Appendix A** contains the pond expansion list which includes those ponds eliminated due to opinion of feasibility/beatifical and additional pond information. These rankings are an initial prioritization which should be constantly re-evaluated as changes occur within the basin and County.

**Table 3.2 Pond Expansion Matrix**

Ranking	Pond ID	Property Acquisition Complexity	Construct ability	Permitting	Level of Basin Development	Infrastructure Required	Total Score
1	107	5	5	5	4	5	24
2	698	4	5	4	4	5	22
3	519	4	4	4	4	5	21
4	116	5	4	4	4	4	21
5	379	4	4	5	4	4	21

29	273	3	3	2	4	3	15
30	23	4	2	2	3	4	15
31	720	2	3	3	4	3	15
32	428	3	2	2	3	3	13
33	569	2	3	2	2	3	12

## 6. POND ENHANCEMENT SCORING CRITERIA

The County tasked Mott MacDonald with evaluating which pond sites could be retrofitted to provide enhanced stormwater treatment. Pond Improvements scoring criteria was based on enhancements that could potentially be made to the existing stormwater pond. These enhancements included pond bottom filter/side-bank filter/ sand chimney upgrades, addition of skimmers, or outfall structure upgrades. Aerial mapping and collection construction documentation was used to determine which pond sites had evidence of a controlled structure and specified the type of structure. All 82 stormwater ponds were evaluated for pond enhancement.

The scoring criteria considers several factors at each individual pond site and assigns a score from 1-5 for each, with a score of 5 being the most favorable and score of 1 being the least favorable. The total scores for each pond were compared to generate a basic ranking of pond sites considering the given parameters. Table 6.1 below shows the decision matrix and point ranking.

**Table 6.3 Pond Enhancement Scoring Criteria**

<b>Eleven Mill Creek Basin Pond Enhancement</b>	
<b>Decision Criteria</b>	<b>Points</b>
PBF/SB/Chimney Enhancements	0 - 5
Skimmer Enhancements	0 - 5
Outfall Structure Upgrades	0 - 5

The project criteria and point system is described below:

### **PBF/SBF/Chimney Enhancement**

Pond Filter/Side-bank Filter/Sand Chimney criteria includes general maintenance of the existing system to replacement of the filter media to a more efficient material. The criteria for this ranking is as follows:

- 0 – 1 General Maintenance of the underdrains.
- 2 – 3 Replacement of underdrain caps and pipes.
- 4 – 5 Replacement of the filter media with bio-activated media.

### **Skimmer**

The Skimmer criteria is defined as the addition or replacement of the existing pond skimmer. The criteria for this ranking is as follows:

- 0 – 1 Minor repairs or adjustments to the existing skimmer.
- 2 – 3 Replace an existing skimmer.
- 4 – 5 Add a skimmer to the pond outfall that did not have a skimmer.

### Outfall Structure Upgrades

The outfall structure upgrades criteria rank the potential modifications that could be made to the existing outfall structure or weir. The criteria for this ranking is as follows:

- 0 – 1 General maintenance and sediment removal
- 2 – 3 Replace portion of the weir or structure, add riprap, or replace orifice.
- 4 – 5 Total replacement of the existing structure or weir.

## 7. POND ENHANCEMENT RANKINGS

Table 7.2 details the pond expansion criteria scoring, total score, and rankings for each of the pond site. **Appendix A** includes the scoring and additional pond information. The rankings are an initial prioritization which should be constantly re-evaluated as changes occur within the basin and County.

**Table 7.4 Pond Enhancement Matrix**

Ranking	Pond ID	Existing Pond Features	Enhancement Scoring			Total Score
			Filter	Skimmer	Outfall Structure	
1	387	PBF	5	5	5	15

## 8. CONCLUSIONS AND RECOMMENDATIONS

The Eleven Mile Creek Pond Expansion and Enhancement Report identifies those pond sites which could be expanded or enhanced. Mott MacDonald has reviewed list of stormwater ponds within the Eleven Mile Basin and develop a ranked list of those pond sites which could be expanded or enhanced. Mott MacDonald identified 33 Pond sites which could possibly expanded. Each pond site was ranked based on complexity of acquisition, constructability, permitting, level of basin development, and infrastructure required. The list of pond expansion rankings will allow Escambia County to determine which ponds they would like to further investigate.

Mott MacDonald evaluated 82 ponds for stormwater enhancements based on filter systems, skimmers, and outfall structures. This evaluation documented the ponds existing stormwater features, scores, and ranking based on data collected. The information will get the County to determine which pond sites need to have maintenance or be enhanced in the future.

A priority pond list was developed for those pond sites which had both expansion and enhancements proposed. This list of pond sites was ranked based on the scoring criteria documented in the report. An overall score was determined by averaging the expansion score and the enhancement score. The ponds were ranked based on highest to lowest overall score. Table 8.1 denotes the rankings and overall scores. **Appendix B** includes a map of the priority ponds.

**Table 8.1 Priority Pond Ranking**

Ranking	Pond ID	Enhancement Score	Expansion Score	Total Overall Score
1	698	10	22	16.0
2	324	13	19	16.0
3	379	10	21	15.5
4	1955	12	19	15.5
5	116	9	21	15.0
6	313	9	20	14.5
7	107	4	24	14.0
8	319	9	19	14.0
9	309	9	19	14.0
10	720	13	15	14.0
11	1954	8	19	13.5
12	437	9	18	13.5
13	515	9	17	13.0
14	441	9	17	13.0
15	519	4	21	12.5
16	389	7	18	12.5
17	665	9	16	12.5
18	638	7	17	12.0
19	359	7	17	12.0
20	224	7	17	12.0
21	118	8	16	12.0
22	19	8	16	12.0
23	23	9	15	12.0
24	656	7	16	11.5
25	650	7	16	11.5
26	121	5	17	11.0
27	18	4	16	10.0
28	273	5	15	10.0
29	438	4	15	9.5
30	569	7	12	9.5
31	403	0	18	9.0
32	22	0	18	9.0
33	428	0	13	6.5

This report provides Escambia County the information needed to assist the County in pursuing grant funding, budgeting future improvements, and the potential of securing necessary properties for pond expansion.
