

# Willowbrook Lake Dam Reconstruction Project

02/21/2019

Location	Length	Design Cost	Funding Source	
			Willowbrook Lake, between Orby Drive and Dye Street	3 Acres
			OTHER	N/A

The Willowbrook Lake Dam Restoration Project is located in District 5 and consists of rebuilding the dam to Willowbrook Lake that was severely damaged during the April 2014 Rainfall Event. The work will consist of completely removing the existing dam and stormwater structure and replacing it with a clay core dam, concrete weir, and triple barrel drainage structure. Work is scheduled to begin in mid-2019.

Once completed, the lake will be restored to its original conditions and assist in stormwater filtration before entering the Escambia River Watershed.
