DISTRICT 4**

**MAY 2026**

## May Progress Is In Bloom

It has been a true pleasure connecting with so many of you through our hands-only CPR classes at the Ferry Pass Community Center and the Tryon Library.

These simple, lifesaving skills make a real difference—because in an emergency, seconds matter. If you have a group of six or more, our team is happy to bring this training directly to your business or organization.

We are continuing to strengthen public safety across our community by adding 10 new EMS positions—five paramedics and five EMTs—to better serve you when it matters most.

In addition, we are advancing preemptive signaling technology, equipping emergency vehicles and traffic signals to help ensure quicker, safer response times by giving our first responders the green light when every second counts.

Staying connected with you remains a top priority. I would love the opportunity to visit your neighborhood association, hear your thoughts, and continue working together for a safer, stronger District Four. Please feel free to reach out to us at [district4@myescambia.com](mailto:district4@myescambia.com).
