

FILLINGIM LANDING

30*40.496/87*24.359

Filligim Landing is located along the beautiful Perdido River. The Northwest Florida Water Management District (NFWFMD) acquired the 5,456 acre Perdido River property in 2006 for water resource protection. Before the District purchased the property, it had been leased to hunting clubs for years and was closed to the public. Now, the landing is open to the public for canoe/kayak launching, swimming, and picnicking.

The Fish and Wildlife Conservation Commission is assisting the Water Management District with managing the property by developing and enforcing rules through the state's wildlife management area program.
