	Water Quality Improvement	0-5		5	Meets multiple criteria
	Natural Systems Resiliency	0-5		4	Meets multiple criteria
				19	
Economic					
	Tourism and Tourism Opportunities	0-4		1	Although not tourism oriented directly, the project proposes to provide basic service necessary to support tourism. Improved water quality will improve local populations of commercial and recreational fish and shellfish. Will also reduce harmful algal blooms. Estimate is that project will require 176 jobs on average to complete; many of which will be high and medium wage. Improved water quality will benefit fishing and ecotourism.
	Recreational Fishing and Local Seafood	0-4		3
