# Envision Escambia 2028: RESTORE Project Selection Criteria

## Q8 Do you have any other comments, questions, or concerns?

Answered: 57 Skipped: 176

#	Responses	Date
1	I don't have a twitter account - how else can I get updates?	2/7/2015 11:08 AM
2	A major portion of funds should be applied to reduction of carbon as an energy source. Hydrogen technology is ready to be implemented if supported by forward thinking leadership.	2/7/2015 8:07 AM
3	Nope. Everything seems to be in order.	2/6/2015 3:17 PM
4	I'm concerned that this survey was not widely advertised and that consequently the results may be skewed towards whatever interest group had the best social media distribution plan.	2/6/2015 3:05 PM
5	The funds from the Restore Act should be used for what they are intended: To restore the environment and economy. To me this means beach restoration, restoration to aquatic animals and habitats, promotion of ecotourism, storm protection, and the promotion or even supplementation of green projects (for example: providing home owners with grants for wind or solar power).	2/6/2015 2:16 PM
6	Environmental restoration IS economic restoration!	2/6/2015 1:21 PM
7	Some of the questions are difficult to understand. Also, need more information about why the survey is important. I think that calling it Envision Escambia 2028 will get less response because people want improvements earlier.	2/6/2015 12:43 PM
8	It's interesting how the more highly populated part of the county gets subdivided out, but those of us who live "North of Cantonment" are lumped together. Are we an amorphous entity?	2/6/2015 10:02 AM
9	I may of missed it but did not see Land Acquisition mentioned. Without the environment, there is no economy and the beach is a huge part of both. Restore Funds are needed to acquire much needed gulf front property for beach parking and public access at Perdido Key. We needed this additional land years ago, not to mention for future generations. I seriously doubt that we will have another opportunity like this. In addition to the much needed parking and beach access, this land could be used for protecting the dunes, habitat and wildlife, in addition to more beach space for recreational activities. Last year (March 3, 2014) emails from Commissioner Valentino, Larry Newsom and other county staff confirmed that there are parking and beach access problems on Perdido Key. Their solution was to bring in ECAT again. Once again, we had the Perdido Key bus route that no one uses, so parking problems were terrible for another summer. The land east of the Crab Trap was purchased by the county, but I'm told the county did not have money to develop it. I don't know how this restore money works, but if there was not enough county money, then could some of the early restoration money of been used simple parking and boardwalks? Will it be ready for this spring season? At any rate, we already need more parking then just the lot next to the Crab Trap. A quote from a recent PNJ story was, "Going to the beach" is the top activity of tourists while they're visiting the area regardless of the time of year or reason for coming to the area. <input type="checkbox"/> Well, the locals and tourists not renting gulf front condos, also consider going to the beach a top activity, but we have parking issues. Local citizens pay taxes and support local beach businesses year round. Pensacola Beach became so overdeveloped and crowded that I stopped going there years ago. <input type="checkbox"/> At Perdido Key we also have the State Park and Federal Park. Both are over crowded in season. In addition, Escambia County has three gulf front beach accesses at Perdido Key. Two of these are very small and poorly maintained. The other one (Beach Access #1) has problems with condo visitors filling the public parking area with boats, trailers, jet skis etc.. I have documented this (photos) which I sent to the county, but not much done about it. <input type="checkbox"/> My business depends on tourism, but my quality of life depends on having easy access to our beaches. The beach is why many of us live here. I have been a resident since the late 50's. <input type="checkbox"/> At any rate, once those last empty gulf front lots are developed, we will look back and wonder why we did not preserve more of our paradise. <input type="checkbox"/> Of course it will be pricey, but these acquisitions will be priceless for future generations.	2/6/2015 2:13 AM
10	Thank you	2/5/2015 5:18 PM
11	Since I live in Santa Rosa County my answers might seem skewed, but I am environmentally conscious and haven't had an opportunity to complete a Santa Rosa Restore survey.	2/5/2015 9:06 AM
12	Do no harm. Every effort should be made with the health of our environment in mind. Any development should strive for energy efficiency utilizing renewable resources and energy. After all, the entire BP disaster was a result of our poor planning, political corruption, and unfortunate dependence upon fossil fuels.	2/4/2015 10:36 PM

## Envision Escambia 2028: RESTORE Project Selection Criteria

13	Not the best survey design ever. Thanks for the effort. We have never tried to take on something like this before. Public education and participation is a touch one.	2/4/2015 9:46 PM
14	The spending of money , specially in relationship to bids and awards need to be absolute transparent so the public can see who is getting all the dollars. A limit per company may not be a bad idea either.	2/4/2015 7:51 PM
15	Remember Escambia County has over 54,000 people with disabilities that have money to spend if you provide access to your projects. The projects must not only meet the ADA requirements but must be user friendly. If the projects are not user friendly the tourest will not come.	2/4/2015 2:34 PM
16	RESTORE funds should not be used to for projects where another "responsible party" already exists; RESTORE should go "over and above" projects that are the responsibility of another (funded) entity	2/4/2015 2:15 PM
17	I am concerned with the amount of chemicals being dumped into our waters because of nearby industries. I work with water utilities and see our bodies of water being unable to sustain its ecosystems in the near future, even if there is no direct dumping, runoff very well still may find its way to our waters that fuel our local economy.	2/4/2015 10:10 AM
18	Just want to repeat that the RESTORE monies are "one-time" monies and need to be spent on "one-time" project that have long-term benefits for the community. Also, non of the criteria focus on proximity to the Gulf of Mexico. A project that improves areas most directly affected by hurricane Ivan should receive preference over one that benefits an inland location.	2/4/2015 9:27 AM
19	BP destroyed the gulf ecosystem and it's residents way of life! There's a lot more crude oil out there!	2/3/2015 5:22 PM
20	Hope this goes for good long-term improvements & doesn't just turn into another money grab for contractors.	2/3/2015 4:31 PM
21	RESTORE projects should be implemented by local consulting firms and businesses. All projects should contain regular follow-up on success criteria in the form of monitoring and compliance.	2/3/2015 1:45 PM
22	Much of the baseline criteria should eliminate it immediately from consideration so ranking doesn't even need to be applied. eg if it doesn't conform to florida building code or ADA (if applicable) then it can be done anyway.	2/3/2015 12:10 PM
23	Do not use these funds on any cement projects. These funds are about the environment, water, air and sea life. Nit for big businesses to become bigger.	2/3/2015 11:39 AM
24	There should be an overarching criteria that projects which encourage renewable energy and smart growth should be preferable to projects which encourage more fossil fuel use, since the BP oil spill came from the demand for fossil fuels.	2/3/2015 11:16 AM
25	I would like to see something along the lines of maritime museum be re-considered. Of course, within it would be a major emphasis on the environment.	2/3/2015 10:18 AM
26	Projects that improve flooding and runoff should be highest priority as this impacts, water quality, environment, business and residential resiliency.	2/3/2015 10:08 AM
27	Workforce Development - technical, skills based training for high skill, high wage, in demand occupations is our key to success.	2/3/2015 10:03 AM
28	I would really like to see some Master Plans done for areas that have typically been underserved, especially those that have had needs identified by being designated as CRAs. Cantonment proper in particular has many deferred infrastructure needs, including stormwater and flooding issues, a community center, and the area needs some type of master plan to show how the area will be upgraded so as to attract economic development and business location. The sewer and water utilities need to be upgraded and aligning it with a proposed road project like the state Muscogee Road project would save time and money. Sidewalks are also desparately need along Muscogee Road. A community Center built on the historic property of the Old Ransom School would be an important beginning to turning around that main thoroughfare and preserving a great historical site for the community. There is an active group already there in Cantonment (Cantonment Improvement Committee) that has been working to develop outreach and education programs for the neighbors there. So many services could be run out of such a center and reduce crime by providing things for local youth to do.	2/3/2015 12:50 AM
29	Because no one can see or predict the future, the project selection criteria needs to be flexible enough for the RESTORE Council and Commissioners to react to future issues (we couldn't predict last April flooding). We haven't had a hurricane in 10 years, Another round of BRAC. Opportunity to help create or support creating another "Navy Federal Credit Union" Flexibility is not a bad thing. Don't pidgeon hole the money.	2/2/2015 1:50 PM
30	Environmental projects should be given top priority in this process. No projects should be approved that do not have a connection improving our County's physical environment and exist only to put money in the pockets of the usual suspects in the Escambia County pork trough.	2/1/2015 6:50 AM

## Envision Escambia 2028: RESTORE Project Selection Criteria

31	Other than staying on top of this, and keeping it a major priority with visiability/monitoring	1/31/2015 9:57 PM
32	This was a somewhat confusing survey...	1/31/2015 6:43 PM
33	Things that prevent destruction of property and death of people are the MOST important of all. Sidewalks, traffic signals and Flood prevention are extremely important. Tired of people getting killed and tired of property loss from preventable flooding. Lighting is important too, but at least people can provide their own light in most cases.	1/31/2015 10:48 AM
34	No project should be done that requires future county monies to support. this is an opportunity with millions of dollars an I suspect much will be squandered away by bureaucrats.	1/31/2015 8:36 AM
35	None	1/31/2015 7:27 AM
36	yes many	1/31/2015 7:09 AM
37	Use no funds for tourism or new facilities. Only focus on environment	1/31/2015 6:28 AM
38	Education should be the number one priority in this community and is the only way to solve our tremendous poverty in Pensacola. People are suffering.	1/30/2015 11:42 PM
39	It is important to realize whatever money obtained from the settlement can be quickly spent with all of the ideas generated. Projects should have a lasting legacy. Improving water quality by reducing point and nonpoint sources, land acquisition around Carpenter Creek, restoring the delta at the mouth of Bayou Chico, pervious surface parking lots, incentives for coastal retreat on Santa Rosa Island, and sustainability are all important goals.	1/30/2015 10:32 PM
40	The BP spill killed my business. The money I received from them was insufficient. If this monies they will provide help existing businesses, then so be, but the small business owners need to be supported more.	1/30/2015 7:00 PM
41	We need projects which promote historic district improvements for our historical areas. This is a great source of potential tourism for our area if we promote this wonderful City and all its history.	1/30/2015 6:05 PM
42	It makes NO SENSE to allocate money to an unnecessary and non-beneficial project, such as the fish hatchery (which could be built in Pace, if actually needed (where land is cheaper).	1/30/2015 2:58 PM
43	Help is required in Pleasant Grove due to flood waters pouring off the Navy Base and flooding the North Loop / Robertson Rd. area	1/30/2015 10:26 AM
44	Tourism should become a priority	1/30/2015 9:38 AM
45	BP	1/30/2015 1:31 AM
46	Support the beach!!!	1/29/2015 5:56 PM
47	Al already have a boat ramp shortly after the BP spill, and we do not have a set of plans even other projects are ahead of Escambia County.	1/29/2015 5:02 PM
48	More should be directed towards tourism as that is what was effected equally to the Enviromntal	1/29/2015 1:19 PM
49	I was very unhappy when rejected by RESTORE to improve our 1944 home because of attic joists being too far apart. My husband is 100% disabled, and we're in our 60s, living on a fixed income. We needed the help, and were rejected.	1/29/2015 10:10 AM
50	Complete and build walk over structure at the public beach access on Perdido Key	1/29/2015 7:30 AM
51	Important and somewhat important are switched in position after the first page. Is that intentional?	1/29/2015 5:41 AM
52	Preserve and restore the area's environment, this money is not for enriching politically connected developers and businessmen.	1/28/2015 10:47 PM
53	Please have public meetings to insure community involvement is met before moving forward.	1/28/2015 4:56 PM
54	Restoring the environment, and in many cases improving on what existed before the oil spill, will be essential to all other restore projects. Our economy is dependent on a healthy environment. And to ensure our future health environment and economy, improving the resiliency of the natural environment and the built environment will be critical to the success of all Restore efforts. We must take climate change seriously, and that will sometimes require going beyond merely restoring conditions to pre-oil spill status. It will mean, for example, preparing for rising seas, more heat, and more frequent and stronger storms and heavy precipitation events. Restore funds should be used wherever possible to strengthen our total resiliency.	1/28/2015 3:43 PM
55	High paying jobs that provide benefits are a vital need in our community.	1/28/2015 3:36 PM

Envision Escambia 2028: RESTORE Project Selection Criteria

56	Crime is a major problem in Escambia County. Please bring back the off duty cop patrols. They were very effective ! ALso we need more lighting on the roads.	1/28/2015 1:01 PM
57	Listen when folks like Ernie Rivers speak and try for once to think about this without thought of how you and yours can capitalize...	1/28/2015 12:39 PM
