

Workshops and Site Visits: Regional Flood Resilience for Water and Wastewater Utilities in Escambia, Santa Rosa, and Okaloosa Counties

Invitation

You are invited to participate in free workshops and site visits to build regional flood resilience for water and wastewater utilities in Escambia, Santa Rosa, and Okaloosa Counties. Utilities in the three counties will work together with local mitigation planners and floodplain managers to:

- Assess flood risks
- Identify vulnerable utility assets
- Identify mitigation actions for utility and region
- Integrate utilities into local/state mitigation plans
- Explore funding for mitigation actions.

Who should attend?

- Water and wastewater utility staff in the 3 county region
- Local mitigation planners
- Floodplain managers
- Local emergency management staff

How are the workshops/visits structured?

The workshops and site visits are based on FEMA's hazard mitigation process and draw from EPA's [Flood Resilience: A Basic Guide for Water and Wastewater Utilities](#). They build on each other so attendance is expected at all events.

- Workshop One: Mitigation Planning and Flood Resilience
- On-site Visits: Assessments at Selected Utilities
- Workshop Two: Mitigation Projects and Plans

Where and when are the workshops?

Emerald Coast Utilities Authority
9255 Sturdevant St
Pensacola, FL 32514

- Workshop One April 22, 2015
- On-site Visits June 2-4, 2015 (Pick one day)
- Workshop Two June 24, 2015

Who is sponsoring the workshops/visits?

Environmental Protection Agency, Federal Emergency Management Agency, Florida Department of Environmental Protection, Florida Rural Water Association and Florida Division of Emergency Management, Bureau of Mitigation *(There is no cost to participate and CEUs/PDHs will be offered by FRWA)*
