September 17, 2020, 6:00 pm – EREC’s power system took a heavy hit from Hurricane Sally. Our system presently has 7,668 members without power representing 67% of the membership. The transmission lines to the Bratt and Oak Grove substations have been repaired which immediately brought several hundred Escambia County members back online.

Crews are working nonstop making repairs to our electrical system. Line personnel from other co-ops are assisting our crews in a massive restoration effort.

We appreciate your patience, and we want members to know that work will not stop until everyone’s electricity has been restored.
